

About Dialogue in the Dark Singapore

- ▶ Dialogue in the Dark Singapore (DiDsg) is an exclusive collaboration between Ngee Ann Polytechnic and Dialogue Social Enterprise GmbH. Founded in Germany, DiD is a worldwide social enterprise that aims to promote social inclusion of the disabled and disadvantaged.
- ▶ Started in 2009, DiDsg is the first one in the world located within an educational institution.
- ▶ DiDsg attracts over 20,000 visitors annually.
- ▶ It employs visually impaired individuals as guides, workshop trainers and motivational speakers.

Working at DiDsg allows me to be gainfully employed and meet people from all walks of life, to challenge them to think differently. Without DiDsg, I wouldn't have fulfilled my dream to write a play on social discrimination and stereotyping.

Sim Kah Yong

A visually impaired Guides
Coordinator at DiDsg

Learn to See

Choose from our array of programmes...

Enter Dialogue in the Dark Singapore

with colleagues, schoolmates or family members and experience everyday situations - in complete darkness.

It offers a unique, effective platform to raise awareness and facilitate inclusion of all segments in the community, regardless of race, class, religion and disabilities as these are no longer visible in the dark. The concept is simple yet powerful, the experience profound.

The result? A mind-shift, deeper insights, and strengthened bonds.

Tour in the Dark

Experience everyday life as a visually-impaired person. Accompanied by a blind guide, go through themed rooms that simulate familiar environments, and come to understand more about yourself and others.

Corporate Workshops

Learn more about leadership, change management, diversity, communication and team building - in a totally unique way.

Educational Programmes

These are designed for kindergarten to tertiary level students, to enable them to develop empathy, non-visual communication, confidence and self-awareness.

The Empathy Challenge

Step into the different worlds of the blind, the deaf, the physically challenged or the elderly in our new series of curated simulation activities.

Lunch/Dinner in the Dark

Consume a full-course meal in complete darkness! You'll undergo a transformational yet challenging process in relying on your other senses to help you dine.

Customised Programmes

Birthday celebrations, family bonding, drama experiences and more - all in the dark!

Motivational Talks

Invite our visually-impaired guides to your school or company, to share their life stories, and inspire your target audience to overcome challenges.

Totally new and challenging experience! Inspired to try to overcome barriers through being resourceful. It was thought-provoking, and a very different experience.
