

S-L & ME

OCT 2019

For our Service-Learning projects, some of us had the chance to mingle with ministers. We share more here...

this's Iffah

that's Ervin!

"With Minister Indranee Rajah coming for our event, we had to follow Standard Operating Procedures (SOP) due to security issues. I got new insights into how to deal with high-ranking officials, which will definitely prove useful for a career in event management."

- Kritikaa d/o Subramaniam

"We felt proud when Minister Grace Fu expressed amazement at the History Panel we had created for the event. It contained some rare photos of Yuhua that she had never seen before! It was kind of cool that even students like us could expose her to new things."

- Ervin Teo

We organised 3 community bonding events - in Hong Kah, Tanjong Pagar and Yuhua.

Module: Service-Learning in Action
Diploma in Tourism & Resort Management
School of Business & Accountancy

"It was my first encounter with a Minister - I was so stressed! But I ended up wanting to have talked to Ms Fu some more - she really appreciated our efforts. This experience made me feel more confident and capable of being a leader."

- Iffah Dali

We co-created design solutions to help improve the lives of Pulau Ubin residents and enhance social cohesion. These included the refurbishment of Ubin's Taxi Shelter and a new community notice board.

Module: Design Studio 1
Diploma in Sustainable Urban Design & Engineering
School of Design & Environment

"We could barely calm our nerves with all the cameras present, but Minister Desmond Lee was so friendly and asked many questions. In fact, he even picked up our model and brought it over to the Singapore Heritage Society booth, saying we should collaborate with them! In sharing some of the needs and aspirations of Ubin's residents, we hope that we have played a small role in making their voices be heard."

- Shienn Teoh and Phyo K K Tun

"If I were to do this again, I would do things differently. In presenting to Minister Lee, I would use the opportunity to share ideas on what more can be done to keep our waters clean and to improve recycling."

- Jaric Kng

We analysed water quality at East Coast and Labrador Parks, and also did beach cleaning.

Module: Environmental Technology
Diploma in Chemical & Biomolecular Engineering
School of Life Sciences & Chemical Technology

We designed and conducted Music & Movement, Storytelling and Art & Craft activities for preschoolers, as part of SINDA and NLB programmes targeted at the Indian community.

Module: The Child & The Creative Curriculum
Diploma in Tamil Studies with Early Education
School of Humanities & Social Sciences

"I had to multitask - keeping an eye on the children while talking to Minister Iswaran was tough! However, I'm glad that I could share with him on the TSE Diploma. He was impressed that there was such a course!"

- Priveneswary
