Abacavir

Name
Abacavir
Pronunciation
(a BAK a veer)

Brand Names: U.S.
• Ziagen

Brand Names: Canada
• Ziagen®

Warning
• Unsafe and sometimes deadly allergic effects may happen with this drug. Tell your doctor about any fever, rash, feeling tired, upset stomach, throwing up, loose stools, belly pain, flu-like signs, sore throat, cough, or trouble breathing. Do not restart this drug if you have had an allergic reaction.
• The chance of allergic effects is raised in people who have a certain gene called HLA-B*5701. Your doctor may check your blood work before you start this drug. Talk with your doctor.
• This drug may rarely cause swollen liver and an acid health problem in the blood. This may be deadly in some cases. The chance may be higher in women, in overweight people, and in people who have taken drugs like this one for a long time. Talk with your doctor.
