

School of Interdisciplinary Studies

**Broadening Perspectives
Challenging Boundaries**

About

NP's broad-based curriculum preps you to take on complex real-world issues. On top of your core discipline modules, you get to pick from some 65 interdisciplinary electives covering diverse areas such as communication, entrepreneurship, life skills, media, the arts, science and technology.

These electives are offered by the School of Interdisciplinary Studies (IS) and account for up to 18 hours of your curriculum. IS works with other academic schools in NP to conduct the interdisciplinary modules. It does not offer any diplomas.

Advantage

You can explore areas outside your chosen course of study and learn to adapt, innovate, and communicate effectively in an ever-changing social and work environment.

Say, you are a Business student and you can take an IS module on the exciting world of biotechnology.

Interdisciplinary Modules

As part of your learning, you will take both your course modules and interdisciplinary modules. The interdisciplinary modules take place during your class time and count towards your Grade Point Average (GPA).

Some of the interdisciplinary modules include **Sports and Wellness, Critical Thinking & Communication, Cultural Intelligence @ Work, Exploring Contemporary Issues: Business & Society,** and **World Issues: A Singapore Perspective.**

<Suggestion: insert a graphic that depicts the roadmap. Not in this design, but using the simple graphic of our mobile 1st site>

In your 1st year, you take prescribed modules in communication skills, creativity, critical thinking, and sports & wellness.

During your 2nd year and 3rd year, on top of a few prescribed modules, you can choose from more than 65 electives to suit your interests.

Over 3 years, you will take 20 credits' worth of IS modules.

Elective Modules Sample List
