

## School of Interdisciplinary Studies

*Broadening Perspectives. Challenging Boundaries.*

### About

At NP, we develop you to be an agile, self-directed learner ready to take on complex real-world issues in the future workplace. On top of your course modules, you will take up 5 exciting modules across 3 years that will help you build important skills in the areas of communication, innovation, critical thinking, global awareness and interdisciplinary collaboration.

### Advantage

You will get to explore areas beyond your course of choice and develop critical core skills that will complement your domain knowledge. This will prepare you

well for an ever-changing workplace where you will need to communicate and collaborate with people of diverse backgrounds, think critically and continue to learn independently to stay relevant.

### The IS Journey

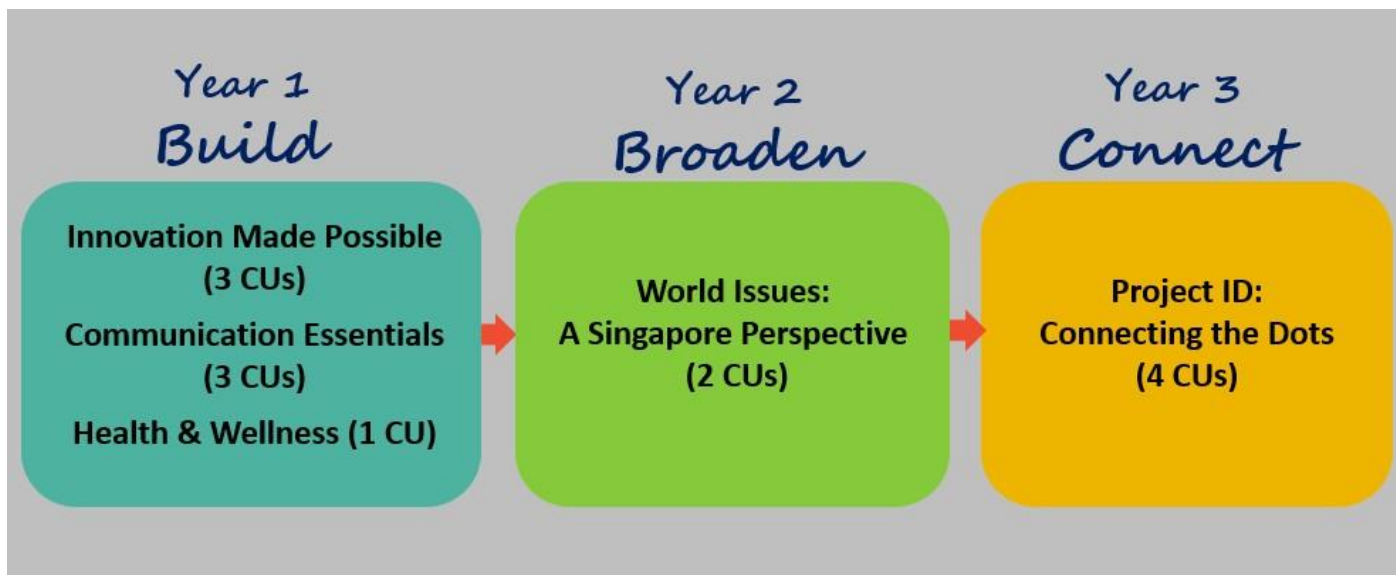

As part of your learning, you will take both course modules and IS core modules.

IS core modules take place during timetabled hours and count towards your Grade Point Average (GPA).

The 5 IS core modules are **Health and Wellness, Communication Essentials, Innovation Made Possible, World Issues: A Singapore Perspective** and **Project ID: Connecting the Dots**.

In Year 1, you will build creative confidence and communicative competence through **Innovation Made Possible** and **Communication Essentials**.

In Year 2, you will develop a global mindset and critical thinking skills through **World Issues: A Singapore Perspective**.

In Year 3, you will collaborate with peers from other courses across NP on an interdisciplinary project to address complex real-world issues.

**Xtra**

Stand out from the rest with an additional certificate on top of your diploma.

***Certificate in Advanced Engineering Mathematics***

Learn GCE A-Level Mathematics to prepare for university admission.

***Certificates in Foreign Languages***

Acquire expertise in French, Japanese or Korean that you can build on to achieve internationally recognized qualifications in your chosen language.
